

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Oak Park Water System Monitoring Requirements Not Met for Radionuclides

Our Community Water System (CWS) violated drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. From 04/01/2023 to 06/30/2023, we did not monitor or test for Radionuclides and therefore cannot be sure of the quality of our drinking water during that time.

What should You do? There is nothing you need to do at this time.

The table below gives more detailed information about this monitoring violation:

Contaminant?	Required # of samples that should have been taken?	# of samples that were taken (if any)?	When samples should have been taken?	When samples were taken (if any) or when will samples be taken next?
RADIONUCLIDES	1	0	04/01/2023 to 06/30/2023	08/08/2023

What is being done? [Describe corrective action.]

Samples have been taken, and mailed to EPD. The city is working with an engineering company that will install a filtration system and a secondary well that will be located on the school property.

We anticipate resolving the problem within [estimated time frame] the year.

For more information, please contact [name of contact] Mayor Mickey Lindsey at [phone

number] 912-578-4115 or [mailing address] 3857 Harrington Street Lyons, GA 30436

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
